

1        **In the Claims**

2        Claims 24 and 25 are amended.

3        Claims 24-30 remain in the application and are listed as follows:

4  
5        24.    (Currently Amended) In a computer system having resources and a  
6 resource planner for granting reservations of amounts of resources to activities, a  
7 computer-implemented method comprising: The method of claim 22, further  
8 comprising the steps of

9            submitting a request for a reservation of a set of resources in specified  
10 amounts from an activity to the resource planner;

11           determining at the resource planner that the request may not be granted;

12           returning from the resource planner to the activity a list of amounts of the  
13 set of resources that are currently available to the activity;

14           using the returned list at the activity to reformulate the request for a  
15 reservation of the set of resources to specify new requested amounts; and

16           resubmitting the reformulated request to the resource planner.

17  
18        25.    (Currently Amended) In a computer system having resources and a  
19 resource planner for granting reservations of amounts of resources to activities  
20 performed on the computer system, a computer-implemented method comprising  
21 the computer-implemented steps of:

22           negotiating between the resource planner and activities to reserve shares of  
23 the resources with the resource planner on behalf of the activities; and

1 in view of changing resource usage or requirements, renegotiating between  
2 the resource planner and the activities to change reservations of resources on  
3 behalf of the activities to reflect the changing resource usage or requirements.  
4

5 26. (Original) The method of claim 25 wherein the changing resource  
6 usage or requirements are the product of a new activity being performed.  
7

8 27. (Original) The method of claim 25 wherein the changing resource  
9 usage or requirements are the product of an activity changing its resource  
10 requirements.  
11

12 28. (Original) The method of claim 25 wherein the changing resource  
13 usage or requirements are the product of an activity no longer being performed.  
14

15 29. (Original) The method of claim 25 wherein the changing resource  
16 usage or requirements are the product of a persistent overload of use of a resource.  
17

18 30. (Original) The method of claim 25 wherein the changing resource  
19 usage requirements are the product of a change in resource allocation policy.  
20  
21  
22  
23  
24  
25
